# Why Housing?

## All women have value

We value all housing efforts that seek to overcome the challenge of homelessness. We know that there are many valuable organizations and heroic individuals who give tirelessly to provide housing.

## Life-Affirming Support

The life-affirming effort of aiding women, children and families in and around pregnancy necessarily includes the promoting and providing housing resources and extended care.

Strong housing services are the result of committed individuals and organizations striving for excellence in all areas. To inspire excellence among maternity home providers and articulate a collective voice, leaders from various housing organizations formed the Maternity Housing Coalition (MHC).

## The power of a Network

The National Maternity Housing Coalition is lead by a governing Council elected from its membership. The Council operates in a partnership agreement with the leadership of Heartbeat International to actively serve, promote and facilitate affiliate activities and programs.
